

MASAKHE NEWS

Planting seeds of kindness was the motto we adopted when we reopened our **After School Safe Spaces** hub in Leiden. As we plant our vegetables and herbs we also learn about kindness, sharing and taking responsibility for our actions. Due to the Covid19 regulations, we could only accommodate 40 learners from grades 5, 6 and 7. To ensure we make a difference in the lives of the children in the area, we teach them Maths, English literacy, Computer Skills and Life Skills with a twist. Their regular attendance is a sure indication of their enthusiasm for the new offering. Thank you to Tracy Lange and the Kfm team for the beanies and scarves, it kept our children warm during the winter months.

A few days ago we had our first harvest of herbs and the children were amazed by the results of their handwork.

Our **Addiction Awareness programme** has been designed to not only assist addicts and their families but also any person who requires assistance to overcome habits which could affect them adversely. We currently have 3 hubs where we assist those in need on a weekly basis or more frequently if required. Our fourth hub will open in Ocean View once our facilitators have graduated.

Due to Covid19 many families are still experiencing tough times and the unrest we experienced in parts of KZN and Gauteng amplified the cry for help. During the past three months we were able to assist 2400 families through our **Outreach programme**. The regular support we receive from our donors made this possible.

THANK YOU to all our donors and volunteers, you make our task easy. A **special** thank you to Tony Lorenzo, Warren Dodgen and 10 other cyclists who cycled 880kms from Gqerberha to Cape Town to raise funds for Masakhe Foundation – the total of R150 000.00 raised will assist us in “planting more seeds of kindness”.

For additional information, please connect with us via our various social media platforms, email or give us a call.

Thank you for your support.

The Masakhe Foundation Team
